

Use Case: Submit Pre-screening Survey

Primary Actor: Trial Candidate

Related Requirement: FR-002

Preconditions:

1. The Trial Candidate has successfully accessed the clinical trial recruitment portal.

Postconditions (Success):

1. The candidate's survey data is saved to the recruitment database.
2. The system has triggered the automated eligibility evaluation (FR-001).

Postconditions (Failure):

1. No survey data is saved; the candidate remains on the survey form.

Main Success Scenario:

1. The Trial Candidate selects the "Start Pre-screening Survey" option on the portal.
2. The system displays the medical survey form with required demographic and medical history fields.
3. The Trial Candidate inputs data into all required fields and clicks "Submit".
4. The system validates the inputs to ensure no required fields are blank.
5. The system saves the survey data to the database.
6. The system automatically triggers the "Evaluate Eligibility" process («include»).
7. The system displays a success confirmation message to the candidate, thanking them for their submission.
8. Use case ends successfully.

Alternate Flow:

4a. Missing Required Fields (Validation Failure)

1. At step 4, the system detects that one or more required fields are blank.
2. The system rejects the submission.
3. The system highlights the specific missing fields and displays an error message prompting the user to complete them.
4. The Trial Candidate fills in the missing information and clicks "Submit" again, returning the flow to step 4.
